

FOR IMMEDIATE RELEASE

## NuVox Launches SIP Trunking Services

IP-Based Solution Readies Businesses for Multimedia Communication Demands

**January 7, 2009 - Greenville, SC** - NuVox, a leading competitive communications provider, announced today the availability of SIP (Session Initiation Protocol) Trunking to customers in the Southeast and Midwest. SIP Trunking helps businesses establish more efficient bandwidth along with enhanced voice and data connections to the web, PSTN, and private MPLS data networking services.

“We believe that SIP will eventually become the standard method of delivering voice and data connectivity to businesses,” commented Chris Benyo, Executive Vice President of Sales and Marketing for NuVox. “The release of this product allows our customers to become more efficient and benefit from the latest communications technology.”

NuVox SIP Trunking is compatible with a variety of premise-based IPPBX systems including Cisco, Avaya, Ingate, and Digium to date. NuVox features Quality of Service (QoS) solutions to meet the unique requirements of our customers. NuVox offers a superior Service Level Agreement (SLA) that guarantees against jitter, latency, and packet loss.

NuVox SIP Trunking services are immediately available to business customers in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Kansas, Kentucky, Louisiana, Mississippi, Missouri, North Carolina, Ohio, Oklahoma, South Carolina, and Tennessee.

### **About NuVox:**

NuVox delivers customized managed communications services, information technology, data, security, and voice solutions designed specifically for business customers. NuVox serves approximately 90,000 customers in the Southeast and Midwest, and provides select services throughout the United States. NuVox delivers services via its industry-leading MPLS-based wide area private IP network. In addition to retail solutions, NuVox also provides services to government and wholesale customers.
